Node.js, TypeScript, React, Git, Cloud, GCP, AWS (S3), Terraform, Postgres, MySQL, Agile, Automated testing, CI/CD, GitHub Actions, Accessibility, Figma

Professional Work Experience

July 2021 – Present

Software Engineer – FundApps, London, UK

FundApps, one of the world's first "RegTechs", is a SaaS scaleup that helps investment managers monitor and comply with worldwide regulations.

- Grew a cross-functional team from only 2 people to over 10 members in less than 10 months
- Shaped the teams' technical hiring process, including introducing a robust pair programming exercise used for close to 100 (and counting) remote interviews
- Led a transformation project to modernise the UI of our flagship SaaS product, used by 100s of world's leading asset management and investment firms

November 2017 – July 2021

Senior FE Developer – Springer Nature, London, UK

Springer Nature is the world's 2nd largest scientific publishing & educational software company.

- Key contributor to the frontend & backend (Node.js) of a Peer Review System (PRS) which enables researchers submit and review their science for publication. Supports hundreds of journals with several thousand active daily visitors
- Specialised in building and maintaining services that aggregate API data from sources like Freshdesk, Survey Monkey & Google Analytics to create dashboards and reports for business stakeholders
- Developed reusable component library: a company-wide design system and frontend toolkit
- Involved with hiring, standardisation, code reviews and performance audits
- Active contributor to internal "innovation" projects, developer events and lightening talks

April 2015 – November 2017

UI Engineer– ASOS, London, UK

Asos.com is the UK's leading online fashion destination for 20 somethings.

- Member of Web Engineering team responsible for develop new features and maintaining existing code
- Delivered a redesigned Checkout experience in Oct 2016 that moved previous monolith application to a REST API driven microservice architecture, with an optimised, offline friendly single-page KnockoutJS frontend. Currently still used by millions of web visitors each month
- Involved with community initiatives including running code clubs for ASOS foundation and Princes' Trust charities

October 2012 – April 2015

UI Developer – Lastminute.com, London, UK

Lastminute.com is leading online travel provider and one of the pioneers of e-Commerce of the first dot-com era.

- Led adoption of a responsive design strategy and pushed for the adoption of modern (at the time) UI frameworks such as Bootstrap, LESS and Grunt
- Built and maintained new cross-category responsive website on AEM platform to replace decade old legacy CMS. Developed Frontend components such as the search form and AJAX 'cheapest price' live data feeds on lastminute.com/flights
- Contributed to the development of the mobile web application built in Backbone.js for mobile devices

June 2011 - July 2012

Web Developer – Telegraph Media Group, London, UK

Telegraph Media Group, publisher of The Daily Telegraph, is one the world's top news sources with wide readership online with Telegraph.co.uk.

- Develop new features and maintain existing code on Telegraph.co.uk
- Test, validate and integrate 3rd party APIs such as Google, Webtrends & Expedia

- Ensure optimum performance/uptime of the website and all digital properties
